### NOTE LIST -- SUMMER 1993

This list is coming out slightly later than planned. Our last note and coin lists did very well and kept us very busy. Not many new issues have come out in the past several months so only a few are included on this list. The rampant inflation in Zaire is continuing and new higher denominations have come out. The price of most of the recent Zaire issues has come down, but some of them could become good notes since they are only issued for a short period of time. A large number of Zambian notes have come on the market (P-24 to P-35) so prices have come down considerably (the central bank sold out their inventory !!). We plan to go to Africa in September for a month and hope to pick up a lot of notes and coins (... and see friends and lots of animals). Our next list is planned for early 1994 and this list is valid until then.

As usual we try to offer you properly graded notes at the lowest prices around. Obviously we cannot have the lowest prices on every note, but we do on most, as is evident in this list. Our Unc notes are genuine Uncs, without counting folds nor have they been washed and pressed as some (too many) are nowadays. Be careful when buying notes, examine them carefully!! Compare our grading and pricing with any dealer (even after all their big discounts). You will be pleased. We hope you find something of interest.

#### Description of grading used.

For Notes: Unc: New, as issued, no folds or creases. AU-Unc: New, except for a counting fold, edge wrinkle or a bent corner. AU: One very light center fold or a few minor wrinkles at the edge. EF: One center fold and maybe a few minor edge wrinkles. VF: 3 folds and maybe a few light wrinkles, maybe some light soiling, still very crisp. F: Several folds and creases, some smudges or dirt, no holes, no tears into design if any at all. VG: Many folds and creases, dirty, maybe a slight hole at the center, small tears (if any), design worn along folds. G: Many folds and creases, tears into design and small holes. Defects such as pinholes(phs), corrosion marks (cor mks), ink letters (ink let), rust marks (rt mks), small tear (sm tr), graffitti (graf), tears (trs), tears into design, soiling (soil) and any others will be described.

Conditions of sale at end.

## SPECIAL NOTICE

### To our overseas customers

Banks in the U.S. now charge a collection fee (from to \$15 to \$50) for bank drafts, money orders etc. that do not have computer coding on the bottom, eventhough the bankdraft etc. is drawn on a U.S. bank. The computer coding, an example of which is shown here:

⑆322270097⑆ 257011726 3⑈ 0437

allows automatic collection. Without the coding the bankdraft has to be sent for special collection and each bank that handles it, charges a fee.

Due to the high cost of processing these bankdrafts, money orders etc. we cannot accept them without this coding. If your bank cannot issue such a bankdraft then you can send either cash U.S. dollars via registered Air mail, or travellers checks made out to "Notes for Africa". Make sure you sign the traveller's check in BOTH places and keep a record of the number of the check.

Thank you for your assistance in this matter.
